

DULUTH HERALD IS PRINTED ON PAPER MADE IN THIS CITY

EDITORIAL PRAISES NEW INDUSTRY HERE

New Plant in Brainerd, Operated by Northern Minnesota Citizens, Adds Many Men to Payroll

Brainerd to be Congratulated on Substantial Character of Addition to Productive Enterprises

(Editorial from Duluth Herald, June 25. Entitled, "A New Northern Minnesota Industry.")

This issue of The Herald is printed on paper from the first carload of rolled paper made by the new paper mill of The Northwest Paper company at Brainerd. The mill has been working for some time on other kinds of paper, but the carload on which this issue of The Herald is printed is the first output of its kind from the new plant.

The Herald is proud of this for several reasons. First, because this is a new and important industry in Northern Minnesota which it is glad to patronize. Second, because when the Cloquet mill of The Northwest Paper company began operations twenty years ago The Herald bought the first carload of paper it put out, and has been using it ever since.

This new plant, which is owned and operated by Northern Minnesota citizens, is a welcome addition to the ranks of Northern Minnesota industry. It adds many men to the payrolls of Northern Minnesota—men who will be citizens of Minnesota and will consume Minnesota products. It is complete, up-to-date, efficient—half a million dollars has gone into its construction, besides the valuable experience and knowledge and judgment of those who built it. This mill enjoys the distinction of being the first convertible mill in the country. It is so devised that it can be quickly shifted from the production of print paper to the production of book paper.

Minnesota is to be congratulated on the substantial and permanent character of this latest addition to the ranks of its productive enterprises, and particularly is Brainerd, which will house the industry and its workmen, to be congratulated.

Congratulations are due, too, to C. I. McNair, the general manager of the company, who enlisted the Weyerhaeusers in the building of the Cloquet mill, who has managed it ever since, and who with the help of the interest of Rudolph Weyerhaeuser has built this industry up to the pinnacle of success that made the new plant at Brainerd a necessity.

Venizelos is to Form New Cabinet

(By United Press)
Athens, June 26—King Alexander has chosen Venizelos to form a new cabinet.

FRENCH CAPTURED FRONT LINE GERMAN TRENCHES

(By United Press)
Paris, June 26—Suddenly assuming the offensive over a wide front northwest of Horthelise the French captured the front line German trenches is an official announcement.

Charged with Plot to Sink His Ship to Block Traffic

(By United Press)
Houston, Texas, June 26—Ralph R. Mosher, captain of a steamer plying between gulf ports has been arrested by federal authorities charged with conspiracy to sink his ship in the Houston ship canal to block traffic.

St. Louis Brewers Say Congress Gives Wilson More Power

(By United Press)
St. Louis, June 26—The brewers here say that congress is seeking to give President Wilson more autocratic powers than the ex-Czar of Russia had, and believes the food bill will be declared unconstitutional because it does not provide for compensation for the industries that it would wreck.

Sinking of Steamer Brings Argentine Close to a Break

(By United Press)
Buenos Aires, June 26—The sinking of the Argentine steamer Toro by a German submarine is admitted to have brought Argentine close to the severance of diplomatic relations with that country. The officials declare the sinking make a firm stand necessary.

Bryan Favors Levor Food Bill

(By United Press)
Frankfort, Ky., June 26—Wm. J. Bryan emphatically endorses the Levor food control bill and prohibition clause as passed by the house and hopes the senate will act similarly.

Means Practical Establishment of Martial Law

(By United Press)
Madrid, June 26—The suspension of the constitutional guarantees announced by the cabinet means practically the establishment of martial law, widespread political intrigue being given as the reason.

Labor Represented on Each District Exemption Board

(By United Press)
Washington, June 26—One recognized representative of labor will be appointed for each district exemption board.

GENERAL SEELY. Former British War Minister Wounded in France.

Photo by American Press Association.
General J. E. B. Seely, British ex-minister of war, has been accidentally wounded in France. The nature of his injuries is not given.

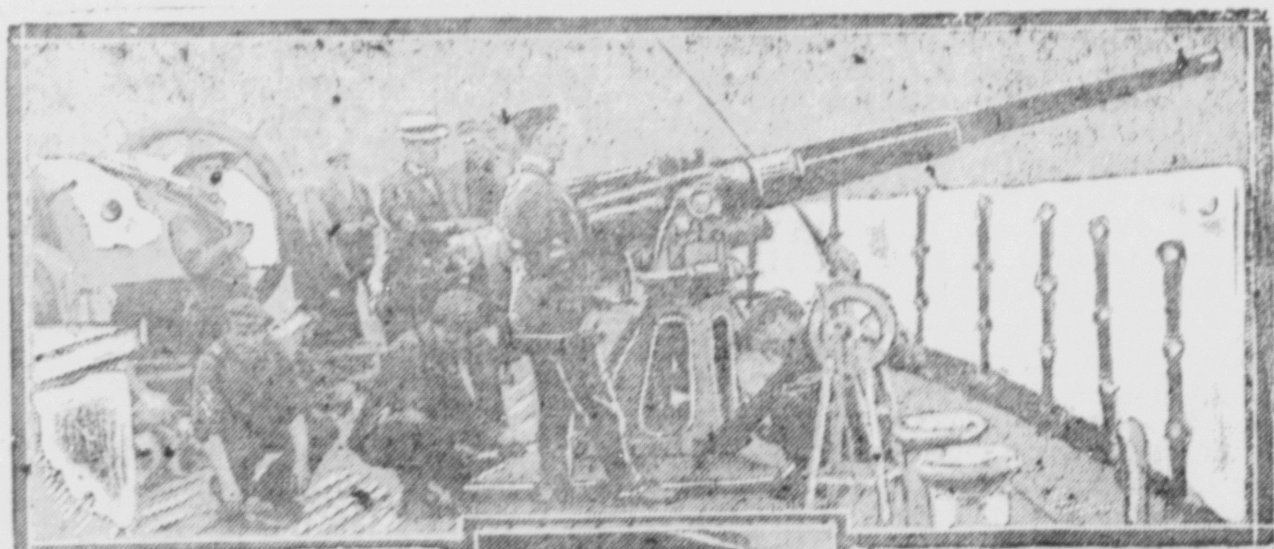

Victor Knutson Superintendent Schools Suspended

(By United Press)
St. Paul, June 26—Governor Burnquist has temporarily suspended Victor Knutson, superintendent of schools of Todd county, pending the investigation of charges of malfeasance preferred by the county commissioners. Knutson says political opposition and the wet and dry fight in which he took an active part last fall is responsible for the charges.

Interchangeable Mileage Books on Railroads Aug. 1

(By United Press)
St. Paul, June 26—The railroad and warehouse commission has ordered all railroads to issue interchangeable mileage books after August.

American Gun on German Ship Ready for Submarines; Hole German Sailors Punched in Vessel's Cylinder

The German ship Ockenfels will sail from Boston with American guns mounted fore and aft to destroy German submarines which may attack her in her voyage to Europe with provisions for the allies. She was one of the vessels seized at the declaration of war, and one of those whom the German sailors in charge tried to damage. The lower illustration shows the hole they punched in one of her cylinders. After drilling the holes they knocked in the walls with hammers.

Crow Wing County Exemption Board Members Named

(By United Press)
Washington, June 26—The Minnesota local exemption boards have been announced, and the names for the Crow Wing county board are: Sheriff Claus A. Theorin, County Auditor C. W. Mahlum, Dr. Walter Courtney, surgeon. Notice of the appointment of 372 local exemption boards in Minnesota were received by Gen. Wood today, and the acceptance must be filed within 48 hours.

Coal Producers Beat Consumers Out of Big Sums

(By United Press)
Washington, June 26—That the American coal producers are beating the consumers out of great sums of money daily under the cover of war conditions is the statement made to the Interstate Commerce Commission by C. M. Moderwill, the Chicago member of the coal committee of the National Defense, and he was a coal man until recently.

Senate Releases Farmers Until Fall Under Food Bill

(By United Press)
Washington, June 26—The senate agricultural sub-committee votes to include in the food control bill the regulation of coal, steel, oil, farm implements and other necessities. It amends the bill to exclude from the control of the food administration the matter of consumption and what the people shall take, and further agreed to release the farmer from all regulations until fall.

Prohibition Fight Endangers Whole Legislative Program

(By United Press)
Washington, June 26—The prohibition fight in the senate endangers the whole legislative program and the sweeping dry amendment of the house results in confusion that may block the Levor food control bill.

T. P. O'CONNOR. Noted Irishman Arrives With Home Rule Mission.

Photo by American Press Association.
The genial "Tay Pay," always a favorite in this country, where his writings and his oratorical wit have made him popular, is now chief censor of moving pictures for Great Britain. He is a member of the Nationalist mission which is now here in the interests of home rule.

No Surplus to Leak to Germany Under New Order

(By United Press)
Washington, June 26—The neutral countries will be on shorter rations hereafter as the National Defense Council is to apportion supplies subject to the approval of the president and care will be taken so that there will be no surplus to leak into Germany.

Arrest Nine Suffragists

(By United Press)
Washington, June 26—Nine more suffragists were arrested on charge of carrying banners.

NO MINNESOTA BANK CALL

Pearson Says Recent Statement Makes New One Unnecessary.
St. Paul, June 26—Following a federal call for statements of the condition of national banks at the close of business June 20, F. E. Pearson, state superintendent of banks, said that contrary to usual practice no corresponding call will be made on Minnesota state banks.
"The law requires this department to make but four calls a year and evidently intends them at about quarterly intervals," said Mr. Pearson. "Nevertheless we have already made two in 1917 and the last one fifty days ago."

CROW WING COUNTY SUNDAY SCHOOL MEET

Convention Opens Thursday Afternoon at the New First Methodist Church, with Fine Program

Stress Laid Upon Qualifications Workers Should Have to Make the Next Year's Work a Success

Victory will Come by 1918 Prediction of Root in Moscow

(By United Press)
Petrograd, June 26—If every allied country and their people turn their attention to the business of war the victory will come by 1918 is the prediction of Elihu Root at Moscow. He said the Americans accept all the interpretations of Russia's formula for peace without annexations and without contributions but demands the reestablishment of Belgium and Serbia.

John Lind Sees Peace in a Year

(By United Press)
Minneapolis, June 26—John Lind sees peace in a year, and says that Germany cannot get the necessary fertilizer for use on their lands to raise crops.

Russian Situation Grave but Outcome Certain Democracy

(By United Press)
Washington, June 26—The Russian situation is grave, Ambassador Bakhmeteff told the senate today. Cheers from the floor and galleries followed his announcement that the outcome was sure to be favorable to democracy.

British Planes Fight Germans in Air Battle

(By United Press)
London, June 26—Three British naval planes fought ten German planes in a aero bout over Roulers, shooting down one in flames and probably destroying two others.

LIQUOR MEN ARE HOPEFUL

Believe They Have Found Loophole in Food Control Bill.
Washington, June 26—Antiprohibitionists, who are hopeful at least of tempering the amendments to the food bill which passed the house Saturday night so they will not make the country "bone dry," are claiming to have discovered a loophole or "joker" in the Barkley amendment which would permit the manufacture of alcoholic beverages from molasses.
The Barkley amendment provides that "no person shall use any foods, food materials or feeds in the production of alcohol, except for government, industrial, scientific, medicinal or sacramental purposes," and imposes heavy penalties.
Senator R. F. Broussard of Louisiana, authority on sugar, said: "The molasses out of which alcohol is made is not edible; it is the refuse of refined sugar and up to the time that it was manufactured into alcohol it was thrown away. It would be thrown away now if not used for the manufacture of alcohol."

Crow Wing County has maintained an enviable record in Sunday School work. This has been due to the fact that the officers of the Crow Wing County Association have laid much stress upon the training of its workers. The county convention that opens Thursday afternoon at the Methodist Church has for its primary object the training of the workers for more efficient work. Little time is consumed with reports; the stress is laid upon the necessary qualifications the workers should have to make the next year's work a success.

Rev. E. H. Given of St. Paul will represent the state and bring to the workers the general plans the state association suggests that the country workers follow. He will appear on the program Friday. Rev. W. E. Gratz will speak Thursday afternoon and evening. His messages are most inspirational.

The new Methodist church is a fitting place for holding this convention as it is planned particularly for Sunday School work.

REGISTRATION FOR DRAFT IS 9,569,382

Washington, June 26—Official war registration returns, with Niagara county, N. Y., and three Wyoming precincts missing, show a total enrollment of 9,569,382, or approximately 96 per cent of the census bureau's estimate. The apparent shortage is more than offset by the number of men in the army and navy who were not required to register.

Of the registrants reported, 7,347,794 are white citizens, 953,889 colored, 1,239,865 unaturalized foreigners from countries other than Germany, 111,823 unaturalized Germans, including those who have taken out their first naturalization papers, and 6,991 Indians.

The abnormal shifting of population since the census of 1910 caused the census bureau to overestimate or fall short of its figures in several states, but as the excess in some states served to compensate for the discrepancies in others the general total was not materially affected.

+++++
JOURNEY TO NEARBY TOWN MEANS WORLD TRIP.
+++++
Washington, June 26.—C. J. Vopicka, American minister to Serbia, Bulgaria and Roumania, has left here in continuation of his globe circling trip from Bucharest to Jassy, cities usually nine hours' distant.
The minister was in Bucharest when the Germans took the city and was not allowed to pass the lines to his station at Jassy. In order to resume his duties in Roumania he found it necessary to cross Austria-Hungary and Germany and embark for America. His route now lies across the Pacific and through Siberia to Russia.
+++++

Wage Increase for 20,000.
Atlantic City, N. J., June 26.—Wage increases ranging between 5 and 20 per cent have been granted to their 20,000 employees by the plants comprised in the Western Sheet Steel and Tin Plate Manufacturers' association, and numerous other concessions on working conditions were granted.

Do You Worry?

Scandia Life Insurance Lightens Load of care and adds to man's years by freeing him from apprehension, See LINDBERGH, Scandia Life Man.

Worms Handicap Your Child

Worms drain the strength and vitality of children, making them dull and listless. Their power to resist more serious diseases is reduced and energy and interest in play is lacking. Kickapoo Worm Killer is a mildly laxative remedy in candy tablet form that children like to take. It kills and removes the worms and lets your child grow strong and healthy like other children. Don't let your child be dragged down by worms. Full directions on the box. At all druggists, 25c.—Adv. tsw

GERMANS COLOR CROP REPORTS

Conditions Are Not as Good as Represented.

PRIVATE ADVICES DIFFERENT

Prospects for This Year Are Described as Anything but Brilliant—Rains Are Urgently Needed to Save Spring Grain and Improve Winter Product.

Copenhagen, June 26.—A report sent out by the German government for free distribution in the neutral press says that, in consequence of the long desired rainfall, the crop prospect in Southern and Western Germany is brilliant and in the middle and eastern provinces it is thoroughly satisfactory.

The report would deserve more credence if Germany had not followed the same tactics on crop reports ever since the war began.

The 1914 crops, which were being harvested when the war started, were described for the encouragement of Germans and for the discouragement of their enemies as unprecedented. The exact figures later showed that it was merely an ordinary miserable grain harvest.

Crops of the drought year of 1915, in some sections a complete failure, were pictured in newspaper reports as thoroughly satisfactory.

Crop Reports Exaggerated.

Last year the official propaganda bureau announced that the yield of grain was exceptionally heavy, though agricultural statistics showed it only 25 per cent above that of 1915.

Private reports received up to the end of the second week of June describe prospects for 1917 as anything but brilliant.

They say that rains are urgently needed to save suffering spring grain and to improve winter grain prospects.

But in no case could they produce better than a mild harvest.

Official reports that fodder cut now is far above the average are flatly contradicted by private advices and are difficult to reconcile with weather conditions Danish crops grown under similar climate conditions were given as poor to bad in last week's official report.

GERMANS SAID TO BE EATING WILD PLANTS

The Hague, June 26.—The New Rotterdam Courant says of the prospective harvest of Northwestern Germany:

"For cattle especially the outlook is decidedly bad. Shortage of potatoes, fats and oils is tremendous."

The paper asserts the harvest of 1917 will be of only moderate volume; that the hay crop is good in quality, but except on low lying fields is lacking in quantity and dried up, and that no second crop is expected.

The Courant adds that, owing to lack of vegetables, people are using wild plants, of which about thirty varieties are eaten. Production of milk and butter is decidedly poor.

Wheat crops, however, look good and the grain harvest is expected to be fairly good.

Giles—So you've got a post in the bank, eh? I suppose it was partly because you knew the manager.

Harris—Partly that and partly because he didn't know me.—New York Times.

FUNDS POUR IN FOR RED CROSS

Goal of \$100,000,000 Has Been Left Far Behind.

NATIONWIDE CAMPAIGN ENDS

New York City Is Believed to Have Contributed Nearly Forty Million Dollars and Returns From the Country at Large Indicate Subscription of Over Sixty Millions.

Washington, June 26.—Tabulation at Red Cross headquarters showed \$100,213,000 in reported pledges, of which \$35,993,000 was from New York city and \$64,220,000 from the remainder of the country. Later reports are expected to show \$5,000,000 more.

All through the week additions will be made to the fund, for campaign committees in a number of cities gathered so much momentum that they insisted on continuing the canvass beyond the fixed time.

Ten million dollars of apparent over subscription may be necessary. It was said, to make the actual collections equal \$100,000,000, owing to the possibility of duplicate recording of some corporation Red Cross dividends at their source and also in the locality where stockholders live.

Just as the campaign was closing the first actual money reached the Red Cross treasury by aerial messenger. Miss Katherine Stinson, a young airwoman, descending on the capital at the end of a two-day flying trip from Buffalo, Albany, N. Y., and Philadelphia, carried to Secretary McAdoo treasurer of the Red Cross, money and pledges gathered from cities she visited.

Alighting near the Washington monument Miss Stinson was taken in an automobile by a Washington women's Red Cross motor corps to the south steps of the treasury, where Secretary McAdoo and a great throng of sight-seers were waiting.

You have made a remarkable and daring trip," the secretary said as he took the envelope containing the money and pledges.

What Limits a Man's Capacity?

The capacity of a man is the amount of responsibility he can carry without worry. Responsibility, as a rule, is taken, not given. When once it is found that a man assumes responsibility with good judgment there are always plenty of people perfectly willing that he should do so. Few men, however, can make a success unaided. The more responsibility a man takes upon himself the more and more dependent he becomes upon those below him to properly carry out his instructions. No man ever achieved great success unless he was ably supplemented by the right kind of subordinates.—Sparks.

JOHN WAHL

Kidney Disorder

(BY DR. T. M. PIERCE)

"The most simple methods are usually the most effective ones when treating any disorder of the human system." The mere drinking a cup of hot water each morning, plenty of pure water all day, and a little Anuric before every meal has been found the most effective means of overcoming kidney trouble. Death would occur if the kidneys did not work day and night in separating poisons and uric acid from the blood.

The danger signals are backache, depression, pains, heaviness, drowsiness, irritability, headaches, chilliness, rheumatic twinges, swollen joints or gout. Since it is such a simple matter to step into your favorite drug store and obtain Anuric, anyone who earnestly desires to regain health and new life will waste no time in beginning this treatment.

MINNESOTA WOMEN SHOULD TAKE THIS ADVICE.

Minneapolis, Minn.—"I suffered for many years with woman's weakness and kidney trouble. I would have dreadful backaches and pains through my side and stomach. I became very weak and nervous, could not sleep nor eat. I would have fainting spells and would fall right over. My doctor did not seem to be able to give me any relief and finally told me nothing but an operation would help me—this I did not want. About that time I saw Dr. Pierce's medicine advertised. I began at once taking Dr. Pierce's Favorite Prescription and this medicine restored me to good health, which I am still enjoying to this day."—Mrs. L. LARSON, 247 21st Ave. N.

MEASURE REACHES SENATE

Food Control Bill Goes to Agricultural Committee.

Washington, June 26.—Formal transfer from the house to the senate of the administration food control bill, with its new and drastic prohibition features added in the house, was accompanied by general prediction the legislation will be enacted finally in time to deal with this season's crop.

While debate on the Chamberlain draft of the bill continued in the senate the measure as it passed the house was referred to the agricultural committee.

Material changes which the administration leaders have agreed to accept and which the subcommittee may adopt are expected to allay opposition to a large degree.

WOMAN'S REALM

BAND CONCERT WEDNESDAY NIGHT

The band concert will be given on Wednesday night at Gregory park. A comprehensive program will be given.

MINISTER SURPRISED

Rev. A. Sorenson Given Ford Car by Members of Congregation and Other Friends

A surprise party was given Rev. A. Sorenson on Sunday evening at the parsonage of the Norwegian-Danish Lutheran church, members of the Brainerd, Long Lake and Motley congregations and other friends having contributed to buy him a Ford car. The crowd gathered at the high school grounds and then marched in a body to the parsonage, where the presentation address was made by Rev. Hoel. Rev. Sorenson was taken completely by surprise. He responded and thanked all for their generosity.

St. Paul's Guild

The Ladies Guild of St. Paul's church has a very important meeting scheduled for Wednesday afternoon at 2:30 o'clock in the afternoon.

First Baptist Aid

The Ladies Aid of the First Baptist church will be entertained by Mrs. Jessie Blake and Mrs. J. M. Hayes at the home of the former in West Brainerd, Wednesday afternoon.

At the Best Wednesday

An excellent cast is seen in support of Alma Hanlon, who is starred in the Apollo-Art Drama, "God of Little Children," the feature at the Best Theatre tomorrow.

Miss Hanlon is perhaps one of the most popular of the younger screen stars, having achieved her wide following in a comparatively short time. After some preliminary work with an important repertoire company, where she was the leading lady, Miss Hanlon made her screen debut in the Geo. Kleine feature, "The Final Curtain." Her work was of such excellence that she was soon in wide demand.

Bicelow Cooper, who plays the leading part opposite Miss Hanlon, is a noted actor from the legitimate stage. He has been featured in Froham productions, as well as those of other important producers of the spoken stage.

Charles Hutchinson, the "heavy" in the photoplay, is a well-known character actor and lead, having been featured by several other picture producers.

The remaining performers in the production are all competent and well-known people.

Don't Let Your Cough Hang On

A cough that racks and weakens is dangerous. It undermines your health and thrives on neglect. Relieve it at once with Dr. King's New Discovery. This soothing balsam remedy heals the throat, loosens the phlegm, its antiseptic properties kill the germ and the cold is quickly broken up. Children and grown-ups alike find Dr. King's New Discovery pleasant to take as well as effective. Have a bottle handy in your medicine chest for grippe, croup and all 50c.—Adv.

Adobe Bricks

Adobe bricks with which the Mexicans and Indians often build are made in two sizes, 18 by 9 by 4 inches and 16 by 12 by 4. They are baked in the sun, being turned each day, for from seven to fourteen days. They are not good for use in a rainy region, as they are not hard enough to withstand the water.—Chicago Tribune.

PEOPLE YOU KNOW

(Little Falls Transcript)

Mrs. L. E. Dunn of Minneapolis arrived here from Brainerd Monday and will visit with Mrs. John Denis.

Dr. and Mrs. A. W. Ide of Brainerd were guests at the home of Mrs. Ide's parents, Dr. and Mrs. J. G. Millsap in this city Monday.

Miss Esther Olson of Wilton, N. D., who has been visiting at the home of her sister, Mrs. R. L. Roller, in Brainerd, arrived here Monday and will visit with her mother, Mrs. S. P. Olson.

(Pillager Herald)

Walter Randall and family, of Brainerd, came Tuesday for a visit with relatives here. Mr. Randall is just recovering from a severe attack of the mumps.

Dorothy Lasher, aged 9 months, daughter of Mr. and Mrs. Wm. Lasher of Brainerd recently passed away. Besides her parents, she leaves two sisters, Delphi and Ethel, and one brother, Ralph.

B. Y. P. U. Election

A meeting of the B. Y. P. U. of the First Baptist church will be held at the church tonight for the election of officers. There will be a social hour afterwards and refreshments will be served. All members and friends are urged to be present.

Methodist Aid

The Methodist Ladies Aid society will meet Wednesday afternoon instead of Thursday afternoon in the social rooms of the church and will be entertained by Mrs. Mathilde Krech and Mrs. W. V. French. Visitors are cordially welcome.

Concordia Young People

The Concordia Young Peoples society was entertained Monday evening by Mrs. Carl Anderson and Mrs. Soren Tollefson at the parlors of the Bethlehem Lutheran church on Monday evening. Morris D. Palsom furnished the Edison and a number of his latest records, providing amusement for the evening.

RED CROSS WAS READY FOR WAR

Forty-four Base Hospital Units Already Organized.

SOME ARE ALREADY ABROAD

Great Size of These Hospitals Can Be Appreciated When It Is Stated That Regulation Buildings in the Most Compact Form Cover an Area of Eleven Acres.

By LEO ARNSTEIN,

Vice Chairman Military Relief Committee, New York Chapter American Red Cross.

TO the general indictment that the American nation was and still is unprepared for war there is one notable exception—the base hospital service of the American Red Cross. When war first broke out in Europe and farsighted men and women saw that this country might ultimately become involved the directors of the Red Cross began to prepare on a large scale for such an emergency. Up and down the land went organizers urging public spirited citizens in cities all over the country to establish units and raise funds for hospital equipment. As this meant in each instance the raising of from \$25,000 to \$30,000 for something whose usefulness was in the minds of the general public very problematical, the task was no light one.

But the workers persisted. As a result when this country declared war the Red Cross was prepared and has already organized forty-four base hospital units—thirty-nine for the army and five for the navy, which will be ready to be turned over to the government with their equipment as fast as they are asked for. Already seven of these have been sent abroad for the use of the allies, and the balance are ready to go at a day's notice.

The base hospital is housed in a substantial, permanent structure anywhere from twenty-five to a hundred miles away from the firing line. The wounded are taken from the trenches by stretcher bearers and carried to the dressing stations immediately back of the line. Here they receive emergency dressing and attention and are then carried back to the field hospitals in ambulances. From the field hospitals, as soon as possible, they are carried by ambulance and hospital train back to the base hospitals, where they are surrounded by the best hospital equipment known to modern medical and surgical science. Portable hospital buildings have been devised, so constructed that they can be easily packed and shipped and set up quickly.

The great size of a base hospital can be appreciated when it is stated that the regulation buildings, in as compact a form as can be arranged, cover an area 1,000 feet long and 500 feet wide, eleven acres in all. The equipment alone when stored occupies 19,000 cubic feet. The cost of mobilizing a unit with its equipment at Philadelphia recently, aside from transportation, was over \$5,000. One base hospital will care for 20,000 men.

The portable kitchen, which feeds 750 persons three times a day, is a new type especially designed for the Red Cross. The portable X ray outfit is even fitted with a generator to provide its own current, as there is never any certainty as to whether direct or alternating current or any adequate current at all will be found already supplied at the point of destination. Then there is the laundry equipment, complete even to a drying room; fumigating, sterilizing and incinerating plants, a completely equipped operating room, laboratory, etc. There is the eight ton refrigerating truck, which is a complete unit in itself, not only producing two tons of ice a day, but running a battery of cooling plants. Connected with each base hospital are three ambulances and a two ton truck for carrying supplies.

The base hospitals are under the direction of the department of the military relief of the Red Cross until mustered into service, when they become a part of the army organization. Forming another very important branch of this department are the ambulance companies. Each company consists of

"HE PROFITS MOST WHO SERVES THE BEST"

Delicious--

Our soda drinks are simply delicious. That's the popular unanimous verdict.

Have you tried one? Have you teased your taste and satisfied your thirst with a cold, fruity, snappy soda drink as we serve it? Be it a simple fruit phosphate, a fizzy cream soda, or a luscious ice cream soda, you can get the flavor or combination you like best, and you surely will get as pleasing and satisfactory a drink as you could desire. The cream plain if you wish, a pure cream, smoothly frozen. The question of service is best answered by a trial. Come, get one drink at our fountain and note the extreme care and cleanliness and rapidity of our service.

LAMMON'S PHARMACY

"THE STORE WITH A CONSCIENCE"

ninety-one men, including five medical officers.

Still another branch of the department of military relief is made up of the hospital units. Each unit is composed of twelve doctors, usually specialists, who may be shifted from point to point wherever the need is greatest.

Aside from this active service in the field, the department maintains a bureau for providing the soldiers with the comforts of life not regularly a part of the government's military supplies, such as extra medical supplies, literature, tobacco and other comforts.

Another important unit is the sanitary training detachment for the medical teaching of first aid. Groups of men are trained for service with the army, resembling the voluntary aid detachments organized with such success in England.

In short, by its activities in caring for the well being of the soldiers the Red Cross probably doubles the efficiency of the fighting forces.

MINISTER FLAYS GERMANY

Says Enemy of America Is the Foe of Mankind.

Ann Arbor, Mich., June 26.—Rev. Hugh Black of New York city, delivering the baccalaureate address at the Michigan university, scored Germany for the war and her conduct of it.

"If Germany is right," Dr. Black said, "then you have a world where everything goes that has the mailed fist back of it, where there is no sacredness in the pledged word, a world where the end will justify any means, where there is no sense of honor, no rights of weaker people, no dictates of humanity to stand in the way. America today, in fighting for her own rights, is fighting for the rights of the world and the enemy of America is the enemy of man."

Bad Health and the Mouth.

Dental educators and high grade practitioners have for years urged medical men and the public to recognize the importance of mouth conditions. But only recently has the menace of pyorrhea, "blind" abscesses and other diseases of the mouth been widely accepted as important factors in general health. By the romance of the microscope and X rays we are learning many things before unknown, and through these agencies the dentist is enabled to put his finger on diseased centers that would otherwise not be seen or positively determined.

We are told that a large percentage of our ills, other than contagious diseases, have their origin in the mouth. As bad health is one of the most dreaded and one of the most expensive things in life, mouth conditions must, therefore, be among the most important things in life. If a healthy mouth is so large a factor in general health, mouth hygiene should be an important part of our children's education. It is essential that every child should be carefully taught how to take the best care of the teeth. We owe it to the coming generations.—Saturday Evening Post.

Before Buttonholing.

Great difficulty is often experienced in trying to keep the edges that are to be buttonholed from fraying. The best thing to do is to run a line of machine stitching along the line to be buttonholed. This will not only prevent the goods from fraying before and during the work, but will insure a stronger and neater effect after it is buttonholed.

The Flag for me and you—
Glorified the whole world wide—
The Red, the White, the Blue!

“ORDER OF THE CLEAN PLATE”

A reader writes in to say that he isn't much impressed with the food reform championed by rich women in some of the big cities—restricting their dinners to three courses. That's fine as far as it goes, says the critic, but it doesn't go very far.

“A majority of us have been getting along on three courses or less for some time, except on occasions when we have had hash. It is the sinful waste of food that must be stopped, whether it be the spaghetti of the workman or the piggyback duck of the millionaire, and the number of courses has little to do with it.”

These ladies, he suggests, ought to organize an “Order of the Clean Plate.”

“An individual should take no more food on his plate than he really wants to eat, and he should be made to feel the shame of it when he does so waste his food.”

Americans are, in this respect, the world's greatest wasters. A time has come at last when we can reform our thriftless table customs without apology or humiliation. What would formerly have been called a stinginess has become a social virtue.

Reports are circulated that A. M. Opsahl is to become Governor Burnquist's private secretary on August 1st at which time Erle Thornton leaves the job to go into the banking business. The oil inspection business is to be turned over to the dairy and food department at that time and the rumor has gained ground from this fact. There has been more or less friction in the governor's cabinet which is one of the strong reasons why Mr. Thornton is quitting the position for a “business proposition.” Mr. Opsahl is close to the administration and his succession to this important position is but a natural consequence upon the abolition of the head of the oil inspection department through the recommendation of the governor.

“Increased production and shipment of coal to the northwest should automatically cause a lowering of prices” is the message sent to the Duluth Herald by the chairman of the committee on coal production of the Council of National Defense. The word brings the information that the efforts being made by the Council of Defense Committee indicates that the needs of the Northwest will be cared for. It is estimated that 12,000,000 tons should be received through docks at the Head of the Lakes, and, while the season started with the supplies depleted, the shortage predicted is not likely to come about.

One dollar out of every five that is spent for food is thrown away in some American households. In the majority it may be only one out of every ten or twelve, but in almost every home the waste is an important item in the cost of living. Investigators have estimated it as ranging from practically nothing to 20 percent of the food purchased, with 7½ per cent as a mean value. Few housewives probably have any idea of what it amounts to in their own homes, but

there are fewer still who could not reduce it if they would.

Your opinion of the war should have nothing to do with your interest in the Red Cross fund, as an exchange remarks: “The soldier must go where he is ordered. The Red Cross looks after him in sickness or when wounded. It plays the role of the Good Samaritan. Would you be a Levite? Would you refuse to ‘help the wounded soldiers?’”

Many persons regard the saving of small amounts of left-over food as unimportant. If they kept accurate account, however, for any period, many families would be astounded by the amount of good food they are throwing out and by the sums that they are paying to the grocer, the butcher, and the milkman to replace good food being absolutely wasted.

The Red Cross does not confine its work to any one country. Germany, England and France each having a larger organization than has the United States, and our soldiers will receive the aid of the Red Cross physicians and nurses, if needed, in any of these countries.

A Pioneer Press correspondent says that former Congressman Lindbergh will seek the support of the Nonpartisan league as a candidate for United States senator next year.

Another Record
Smash Goes
to Bedell

Looking fit for hundreds of more miles, Allen T. Bedell handed General J. T. Bell, Governors Island, New York, a military message from General Liggett of Los Angeles, at the completion of his record smashing run across the continent.

Riding his Goodrich equipped Henderson motorcycle at an average rate of 26¼ miles per hour, Bedell covered the distance in 7 days, 16 hours, 16 minutes, thereby lowering the old record by 3 days, 19 hours and 54 minutes. Bedell also smashed the best transcontinental auto record.

This is the second record breaking performance staged by Bedell this year. Riding a Goodrich equipped Harley-Davidson he broke the world's 24-hour record, by covering 1152.5 miles in one day.

ONE KILLED; DOZEN INJURED

Machine Guns Used Against Sinn Feiners at Cork.

Cork, June 26.—Machine guns were used on the Sinn Feiners in the disturbances here. They were brought into action after the police with clubs had failed to restore order. The soldiers cordoned various points while the police chased the rioters to side streets. After having borne much more stoning the police ordered that guns be fired on the disturbers. One rioter was killed and another severely wounded, while a dozen were treated in hospitals for lacerations and other wounds. The riot was eventually quelled with the troops coming into action.

MAY SOON CLEAR UP
STATE MILITIA MIXUP

St. Paul, June 26.—Adjutant General F. B. Wood straightened out one defect in his accounts with the federal government when, in company with Major William F. Simons of the inspector general's department, Chicago, he went to the bank and transferred \$7,229 from his official account to his personal account.

The government was doing business with General Wood personally as the head of the state's military forces and the deposit in his official account left an apparent deficit in the account with the government.

General Wood explained this at a conference with Governor Burnquist and Captain W. F. Rhinow, military secretary to the governor, and the explanation was accepted. It was a matter of bookkeeping.

Major Simons had no official connection with the affair.

An apparent shortage of \$29,000 in the equipment account still remains. General Wood insists that this property is in the state in the possession of the national guard units, though there are no receipts to show for it.

The Governor and Captain Rhinow left for Washington to compare their own records with those of the war department in an endeavor to straighten out the tangle.

“No one thinks for a moment that there has been any misappropriation by General Wood,” the governor said.

Arizona Rail Magnate Dies.

Prescott, Ariz., June 26.—Frank M. Murphy, president of the Santa Fe, Prescott and Phoenix Railway company and one of the leading financiers of Arizona, is dead here. He was sixty-two years old.

It is not always the man who trains the vine who gets the grapes.

Promises make debts, and debts make more promises.—Chicago News.

NO POLITICS IN
WAR MEASURES

Neither Party Will Benefit on
Account of Conflict.

REPUBLICANS AID WILSON

Without Support of Opposition Party
Many of the Administration's Plans
Would Have Been Defeated—Same
Old Speeches Delivered in Debate on
Rivers and Harbors Appropriations.

By ARTHUR W. DUNN.

Washington, June 26.—[Special.]—Unless the attitude of many prominent Democrats changes it will become apparent pretty soon that the war cannot be made a party question. No party can claim entire credit for the conduct of the war and the support of administration war measures.

So far no administration measure of any importance relating to the war—and this is a war measure congress pure and simple—could have passed without a great deal of support from the Republican side.

The Democratic opposition is not because of the war, but because Democrats cannot bring themselves to vote for such extraordinary grants of power conferred in the various bills, even if it is conferred upon their own president. There is too much centralization in the federal government to suit the state rights ideas of many Democrats.

Talk of Politics.

Although I say there can be no political capital made out of the war, it does not prevent talk of politics. There are men who believe that President Wilson will expect a third term out of his part in the war.

Then I heard another peculiar but not improbable suggestion not long ago. It came from a Republican senator who has been supporting the president's measures and has found himself antagonized most effectively by Senator Reed of Missouri.

“Jim Reed,” he said, “is one of the strongest men in the senate, a powerful debater, forceful in his expressions, bold in all his positions. It seems to me that he is in training for the presidency and proposes to take the conservative side in the next Democratic contest, taking his stand upon pure democracy and the rights of the people.”

Newlands Steps at Nothing.

In answer to several assertions on the floor of the senate, coming mainly from his own side of the political aisle, Senator Newlands in support of one of the war measures said:

“If we have got temporarily to Prussianize America in order to beat Prussia I am willing to do it.”

Same Old Speeches.

Speaker Clark took a hand in the rivers and harbors debate long enough to urge speeding up of the measure. “This miscellaneous and promiscuous talk,” said Champ, “delivering the same speeches that have been delivered here to my certain knowledge a hundred times, ought to end and other measures considered.”

And to an average onlooker there is a deal of sameness to all the speeches against the rivers and harbors bill, whether in the house or senate.

The Inattentive Senate.

No one has had the nerve to propose the Tom Marshall idea as a cure for inattention in the senate. The vice president, says that if he were autocrat of the senate he would compel every senator to remain in his seat and listen to every speech. That, he thinks, would bring about a change in the rules limiting speeches and forcing the senate to do business.

“Less than one-third of the senate,” remarked Senator Reed of Missouri, “has paid any attention to the discussion of the most important matters that have come before congress in a generation.” He referred to the various war bills. And it is true that senators do not pay much attention to these or other measures.

Will Overcome Germany.

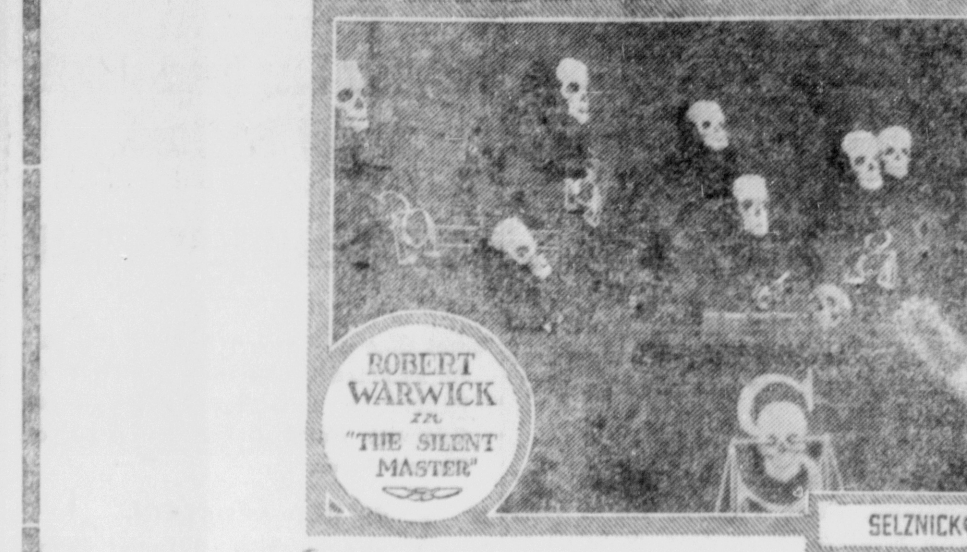

Senator Hoke Smith of Georgia has confidence in the American soldier. “No one can fight better than an Englishman,” he told the senate, “unless it be a Frenchman. No one can fight better than a Frenchman unless it be an American. Man for man our soldiers can beat the Germans. That is why we are going to win the war for the cause of democracy.”

Missed a Sensation.

The only woman member of congress missed a great opportunity to create a sensation. She had a vacancy to fill at the Naval Academy the other day and appointed a young man. Suppose she had carried out the equal rights idea to the limit and appointed a young woman? That would have created a sensation. It is doubtful if anything could be found in the laws relating to the selection of midshipmen to the Naval Academy which would preclude a young woman from appointment. The laws speak of “midshipmen,” and the word “his” occurs in referring to the students. But the word “his” and “he” are found in the constitution and laws relating to members of the house of representatives, but it does not bar a woman from membership in that body.

It would have been interesting if the woman member had tried out the selection of a young woman for West Point or Annapolis.

“THESE MEN MUST
HAVE OUR BEST”

Chairman Davison's Appeal For \$100,000,000 For the Red Cross.

In his remarkable appeal for \$100,000,000 Henry P. Davison, chairman of the Red Cross War Council, said in part:

“We ask for \$100,000,000. It is a large sum of money; but, believe me, the people of this country are not only going to supply that one hundred million, but a very great deal more. * * *

“Hundreds of American doctors and nurses are already at the front. A force of 12,000 American engineers will soon be rebuilding the railroads of France. Upward of 25,000 American men are now on the battlefields of Europe fighting as volunteers in the allied armies. Soon 25,000 American res-

HENRY P. DAVISON, CHAIRMAN OF THE RED CROSS WAR COUNCIL.

gulars will be added to their number. All our national guard is to be mobilized, our regular army is to be recruited to full strength, and 500,000 other men are shortly to be called to the colors. Within a few months we should have 1,000,000 and a navy of 150,000 men.

“These men must have of our best. To prepare against their needs in advance will be a stupendous task which the Red Cross must undertake. Doctors, nurses and ambulances must be made ready. Vast quantities of hospital stores, linen, bandages and supplies of every kind must be prepared, and at once. If we wait it may be too late. When we ask our own sons and brothers to fight for our liberty 3,000 miles from home in a country already sore and afflicted, surely we cannot do less than prepare to take care of them in their day of suffering.”

MORE FEED, MORE MILK.

[National Crop Improvement Service.]
Cows of a decided dairy type will return the greatest profit when fed to their full capacity.—Nebraska Experiment Station.

[National Crop Improvement Service.]

Ordinarily, silage will correct the tendency to costiveness. When it is not sufficiently effective for this purpose, add enough old process oil meal to keep the droppings moderately soft, but not necessarily loose. Usually all that is needed is to increase the allowance of concentrates.

There are always two sides to every question. If the government insists on more bran in flour, bossy will have to turn to still more artificial bran.

Wheat bran is a dear feed. Barley and rye by-products are more economical.

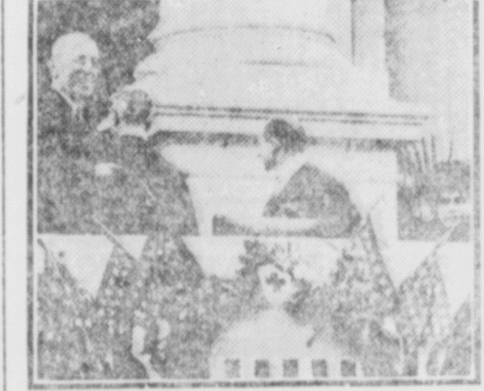

THE WAR COUNCIL
OF THE RED CROSS

Personnel of Strong Body
Named by the President.

The action of President Wilson in appointing the Red Cross War Council with Henry P. Davison of J. P. Morgan & Co. at

its head, set in motion the tremendous campaign for popular subscriptions to a fund which the Red Cross will use for supplying hospitals at the front and also for carrying on relief work at home and in Europe on a scale perhaps greater than the world has ever seen.

Other members of the council appointed are Charles D. Norton, G. M. P. Murphy, Cornelius N. Bliss, Jr., and Edward N. Hurley, with William H.

PRESIDENT WILSON DEDICATING NEW RED CROSS BUILDING, WASHINGTON.—MRS. WILSON AT THE RIGHT.

Taft, chairman, and Elliot Wadsworth, vice chairman of the executive committee, ex officio members.

In appointing the War Council the president earnestly exhorted the American public to support its work, issuing the following statement:

I have today created within the Red Cross a war council, to which will be intrusted the duty of responding to the extraordinary demands which the present war will make upon the services of the Red Cross both in the field and in civilian relief. The best way in which to impart the greatest efficiency and energy to the relief work which this war will entail will be to concentrate it in the hands of a single experienced organization which has been recognized by law and by international convention as the public instrumentality for such purposes. Indeed, such a concentration of administrative action in this matter seems to me absolutely necessary, and I hereby earnestly call upon all those who can contribute either great sums or small to the alleviation of the suffering and distress which must inevitably arise out of this fight for humanity and democracy to contribute to the Red Cross. It will be one of the first and most necessary tasks of the new war council of the Red Cross to raise great sums of money for the support of the work to be done and done upon a large scale. I hope that the response to their efforts will be a demonstration of the generosity of America and the power of genuine practical sympathy among our people that will command the admiration of the whole world.

WOODROW WILSON.

In an interview given the same day Mr. Davison pledged the backing of Morgan & Co. to the undertaking and announced that he himself had temporarily given up all other business to devote his whole energy to the Red Cross financial campaign.

EXPENSIVE PASTURE.

[National Crop Improvement Service.]
When you stop to consider that an acre of pasture will feed a cow, but that that same acre will raise ten tons of silage during the time the cow is feeding on it, it would seem that a grass cafeteria would be the most expensive way to feed your stock.

Constipation

THERE IS NOTHING equal to Chamberlain's Tablets for constipation. When the proper dose is taken their action is so agreeable and so natural that you do not realize that it is the effect of a medicine. These tablets possess tonic properties that aid in establishing a natural and regular action of the bowels. Chamberlain's Tablets have cured many cases of chronic constipation.

Chamberlain's Tablets

Two Out of Three Plays Always Fail.
In an article called “Acting—A Part Time Job” in the American Magazine Walter Prichard Eaton says:
“Suppose we say that a play is rehearsed on an average of three weeks. (Some few are, unfortunately for art, rehearsed less, some a good bit more.) Now, bear in mind the fact, which is pretty well established by figures, that at present two out of every three theatrical productions in America fail. That means the ordinary actor or actress, out of three attempts to land a salary paying job, works at least nine weeks on half pay or less. When you further deduct the usual summer vacation time of, say, six weeks and add a week, at the least, hunting each new job, you reach the rather astonishing conclusion that the average actor may very conceivably lose nine weeks out of the fifty-two entire and nine more weeks in large part. In other words, he is only a part time worker. His ‘magnificent’ salary doesn't look so magnificent when figured on this basis.”

Voracity of Pike.

While two Edinburgh anglers were fishing from a boat on Loch Ard, Aberfoyle, they were attracted by splashing on the surface of the water close to a clump of reeds near the shore. Approaching the spot, they found that two pike—the individual weights, ascertained later, were two and two and one-quarter pounds—were locked together, the smaller of the two in an attempt to swallow the larger, having succeeded in enveloping in its jaws almost the whole head of the other. On the fish being taken into the boat with a landing net considerable difficulty was found in separating them, the teeth of the one being firmly fixed in the skull and gills of the larger fish. While the voraciousness of this fish is well known, it must remain a mystery whether the incident described arose from cannibalism or was the outcome of a fight.—R. M. W. in Edinburgh Scotsman.

PROSECUTION IS THROUGH

Defense in Dunn Murder Case Sets Up General Denial.

St. Paul, June 26.—The fate of Frank J. Dunn, on trial in District Judge Hanft's court on the charge of hiring gunmen to murder his wife, has gone into the hands of the defense.

D. W. Lawler, Dunn's chief counsel, made a short, brilliant appeal to the jury, in which he set up a general denial of Dunn's connection with the murder of his wife.

By the first witness for the defense Mr. Lawler began laying a foundation for the offering of testimony to the jury concerning Dunn's reputation as that of a good citizen, amiable and peaceful in disposition and truthful.

IF BACKACHE OR
KIDNEYS BOTHER

Eat less meat and take a glass of
Salts to flush out Kidneys—
Drink plenty water.

Uric acid in meat excites the kidneys, they become overworked; get sluggish, ache, and feel like lumps of lead. The urine becomes cloudy; the bladder is irritated, and you may be obliged to seek relief two or three times during the night. When the kidneys clog you must help them flush off the body's urinous waste or you'll be a real sick person shortly. At first you feel a dull misery in the kidney region, you suffer from backache, sick headache, dizziness, stomach ache, sour, tongue coated and you feel rheumatic twinges when the weather is bad. Eat less meat, drink lots of water; also get from any pharmacist four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean clogged kidneys and stimulate them to normal activity, also to neutralize the acids in urine, so it no longer is a source of irritation, thus ending bladder weakness. Jad Salts is inexpensive, cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active. Druggists here say they sell lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.

LIVE STOCK SHIPPING BODY

L. P. Hall of Bay Lake, Prof. Wilson, of State University and Farmers to Seek to Organize

A. B. HOSTETTER IN TOWN

Attended Meeting Named and Also Posted up on State Dairy-men's Convention

L. P. Hall, president of the Federation of Farmers Clubs of Crow Wing county, Earl Archibald of Deerwood, and other influential farmers, together with County Agent E. A. Colquhoun, Professor Wilson of Minneapolis, head of the State University Extension Bureau, A. B. Hostetter, Duluth, met at the county agent's office in the city hall for the purpose of seeking to organize a live stock shipping association.

Mr. Hostetter was also in Brainerd to see if all had been prepared for the big Dairy-men's State convention which convenes in Brainerd on June 28 and 29.

MRS. FRANCES ROSENKRANZ

Passed Away June 25 from Cancer, was 66 Years Old. Resided in Brainerd Many Years

Mrs. Frances Rosenkranz, age 66, passed away June 25, cancer being the cause of her demise. She was born in New York state in 1851. When quite small, she went with her parents to Illinois and at the age of 14 she removed to Minnesota with them.

When 26 years old she was married to Fred Bahma and they lived near Lake Crystal. Mr. Bahma died in 1901 and in 1906 she married Sidney Hockridge. He died in 1908 and on January 11, 1910 she was married to William H. Rosenkranz.

She leaves five children that she had in her first marriage with Mr. Bahma, being three sons and two daughters, Charles Bahma who lives at Riverton, George Bahma of Brainerd, William Bahma of Lake Crystal, Mrs. Emma M. Hose and Mrs. Frank of Sleepy Eye.

The sympathy of the community is extended the family in its bereavement.

ROLL OF HONOR

Leaving for the front today were Leonard Swanson, Wilmer Behne, McKinley Howard, recruits, and Henry Howard, Earl G. Mohler and Sidney Hanson, re-called to the First Minnesota artillery.

BRAINERD WEATHER

Greatest Daily Range was 55, Total Precipitation for May was but .44 inches

For the month of May, according to the climatological data compiled by the Minnesota section in charge of U. G. Pursell, meteorologist of Minneapolis, Brainerd's mean temperature was 49.4, the highest was 85 on May 16, the lowest 19 on May 28. The greatest daily range was 55. The total precipitation for the month was .44 inches, the greatest in 24 hours was .21 inches on May 19. At Gull Lake station the precipitation was .54 inches for the month, and .24 inches fell on May 19.

The average precipitation in the state, determined from the records of 100 stations, was 1.94 inches, which was 1.35 inches below normal. The prevailing direction of the wind was from the northeast. The sunshine was above normal. In the northern counties the month was one of the driest on record.

BOARD OF EQUALIZATION

City Board in Session at City Hall Going Over Local Personal Property

The city board of equalization is in session at the city hall, its members being Mayor R. A. Beise, President of the Council F. M. Koop and Alderman J. H. Strickland.

Muscle Soreness Relieved

Unusual work, bending and lifting or strenuous exercise is a strain on the muscles, they become sore and stiff, you are crippled and in pain. Sloan's Liniment brings you quick relief, easy to apply, it penetrates without rubbing and drives out the soreness. A clear liquid, cleaner than musky plasters or ointments, it does not stain the skin or clog the pores. Always have a bottle handy for the pains aches of rheumatism, gout, lumbago, grippe, bruises, stiffness, backache and all external pains. At your druggist, 25c.—Adv.

E. A. WILMER AT SALVATION ARMY

His Work a Source of Blessing to All, has Unique Delivery and Pleasing Personality

SOMETHING SPECIAL IN STORE

At Meeting Tonight, Much Music and Public Generously Asked to be Present at Meeting

The revival services now being conducted at the Salvation Army are meeting with unusual success. Revivalist E. A. Wilmer is proving to be a source of blessing to everyone, and with his unique delivery and pleasing personality is proving to be a channel through whom God is working.

Last night's service proved to be a very good one and the spirit of God was very much in evidence.

REVIVALIST E. A. WILMER

The revivalist has something special in store for those who attend the services tonight and promises a fine meeting.

The music at these services is proving to be quite an attraction and at last night's services Cadet Reed and Miss Lillian Peterson sang a duet in a most pleasing fashion and Mrs. Capt. Belaham favored the audience with a solo.

At tonight's services there will be much music and everyone, Capt. Belaham says, is requested to be present.

DULUTH WON THE GOAT

Much Adversity Animal of Crosby Copped by Duluth in Ten Inning Game, 3 to 2

Crosby has lost its goat for Duluth walloped the range team nine 3 to 2 in a ten inning game, the first defeat Crosby has suffered this year. Umpire Hanson retired in the third inning after the visitors had argued every decision he had made.

Gilligan, says the Duluth News-Tribune, started the game as though he would have things all his own way, but after the first inning he found to his sorrow that Duluth could walloped the ball. The score book shows that Duluth connected for 12 hits.

To pitcher Nagle goes the credit for winning the game. With two out and a man on third he shot a hot grounder to the third baseman who failed to handle it fast enough and the winning run was scored. Nagle also pitched great ball. He did not walk a man, although he did hit three. He struck out 12 and allowed but four hits.

The Twin Ports-Mosaba league will start its second half of the season on July 4 with six teams as a result of Crosby joining the ranks following a league meeting held in Duluth. The schedule for the remainder of the season is being drawn up.

Crosby has a contract with Ironton for a game at Aitkin July 4 and if arrangements can be made Superior will play at that village.

Crosby is backed by George Crosby, Mayor Bauer of that village and George Breen. Dates arranged include July 7 and 8, Hibbing at Crosby; July 21 and 22, Superior at Crosby; July 28 and 29, Crosby at Hibbing; August 4 and 5, Crosby at Chisholm; August 11 and 12, Chisholm at Crosby; August 18 and 19, Crosby at Duluth; August 25 and 26, Crosby at Virginia; Sept. 2 and 3, Crosby at Virginia; Sept. 9 and 10, Crosby at Virginia.

DISTRICT COURT

Plaintiff Concluded Testimony in Hirstad vs Butorac, Motion to Dismiss Denied

In district court the case of Erling Hirstad of Ironton vs Butorac is still on trial. The plaintiff concluded the introduction of his evidence and the defense argued a motion for dismissal, which was denied by Judge C. W. Stanton. The defense is now presenting its case.

LITTLE FALLS BEST SPEEDWELLS

Defeats Local Team 6 to 3 in Game Played at Little Falls on Sunday Afternoon

BAD INNING IN THE FOURTH

Got to Pitcher Nelson, Boys Made a Few Errors and the End Came Right There

Little Falls defeated the Speedwells of Brainerd 6 to 3 in the Sunday afternoon game at Little Falls. The Speedwells had one bad inning in the fourth when Little Falls got Nelson's measurement and coupled with errors they rolled in three runs and got a commanding lead which was maintained. There was a pretty good crowd in attendance.

In the series each has now won a game and the tie will soon be played off. On July 4th the Speedwells go to International Falls. A fleet of cars carried the Speedwells and their friends to Little Falls.

The box score follows:

BADLY BURNED IN STORM

Lightning Burned Face and Left Side of Charles K. Stowell, Seared Hole in His Back

Mrs. Frank Lyons, of 410 South Oak street, saw the lightning strike near the Stowell home Monday morning. It happened about 1 o'clock. She said a great ball of fire rolled along the wire. It hit the house, passed through the plaster of the ceiling and then hit the chimney, she said.

Charles N. Stowell was sitting on the bed and the bolt of flame burned the left side of his face and body and seared a hole in his back. He is at St. Joseph's hospital.

Retired Rear Admiral Dies.

Scranton, Pa., June 25.—Admiral Bartlett James Cromwell, seventy-eight years old, commander of the European squadron at the time of his retirement in 1902, died suddenly at his summer home in Montrose. He was graduated in 1861 from Annapolis.

Alarm Clock Saves Life.

Chicago, June 26.—A belated alarm clock went off twelve hours late and disturbed the sleep of Mrs. Alice Lockie, who was taking a nap on a divan. She awakened to find the house burning and she was just in time to escape.

WANTED—At the N. P. hospital man for orderly work. No experience necessary. 1056-1917

WANTED—Dish washers and chambermaids at the Willard hotel, Altkin, Minn. 1045-181f

WANTED—Girl for general housework. Apply 323 North 3d street, Mrs. H. P. Dunn. 1036-161f

WANTED—Carpenter work, shingling, or lathing. Address 422 Seventh Street North. 1058-1913

FOR RENT

FOR RENT—Furnished rooms at Mahlum block. 1041-1716

FOR RENT—Furnished room in modern home. 623 North Seventh St. 9671f

FOR RENT—Seven room brick house, electric lights. Inquire 502 Vine St. So. 1059-1916

FOR RENT—Four room flat in Model Laundry building. See Slipp-Gruehagen. 995-81f

FOR RENT—Store room 212 South Seventh. Inquire Mrs. Lindner, Mahlum Block. 970-21f

FOR RENT—Furnished room with private bath. At Spalding Apartments, entrance on Fifth. 1063-2013

FOR SALE

FOR SALE—Three fresh cows. C. W. Koering. 1057-1915

FOR SALE—Fresh cow and calf. 1307 8th street south. 1051-1813

FOR SALE—Baby buggy in good condition. Apply 615 N. 5th St. 1048-181f

FOR SALE—Seven room house at 510 S. 5th street. Phone N. W. 438. 1035-1616

FOR SALE—Fresh cow. Enquire P. B. Anderson, three miles south of town. 1044-1813

FOR SALE—Six room house, partly modern. Bargain. Inquire 124 Second Avenue. 641-2551f

FOR SALE—60 gallon gasoline tank and 22 gallons of gasoline, also tank house. Phone 144. 1040-171f

FOR SALE—Team of horses, weight 2200, \$150.00. Lewis Coryell, Houghton's jewelry store. 1030-1516

FOR SALE—Team, harness, two wagons and light box sled. Cheap if taken at once. D. A. Peterson. 999-81f

FOR SALE OR FOR RENT—Good house and barn and large yard at 1205 South Fifth Street. Apply to J. S. Gardner. 1025-141f

FOR SALE—Two four year old mares and one gelding, harness and wagons, \$450.00. C. E. Bailey & Sons, Barrows, Minn. 1050-1814

FOR SALE—My farm of 97 acres, the W 1/2 of SE 1/4 Sec. 23, St. Mathias town, range 31. 60 acres ready for cultivation. Chas. Peterson, 623 Pine St. 1047-1816-w1

MISCELLANEOUS

LOST—A chauffeur's badge. Return to Central Hose House. 1055-1912

FOUND—Pair oars. Apply at Dispatch office and pay for this notice. 1046-1813

HORSES BOUGHT, sold or exchanged. Always have from 10 to 15 head on hand. Jones & Horton. 886-2931f

WANTED—To buy scrap iron. Bring in while prices high. Also all kinds junk. Jones & Horton, Hay Market. 761-2731f

WANTED—I have customers for residence property and vacant lots. List your property for sale with Jas. R. Smith, Sleeper block.

LOST—Black seal grain leather combination bill fold and note book with owner's name on outside in gold letters. Papers therein valuable to owner only. Reward for return to N. W. Tel. office. C. H. McCallin. 1061-201f

HAVE YOUR TRUNK and baggage delivered by auto dray truck service. Headquarters Purity Ice Cream Co., 414 S. 6th street. Phones N. W. 727, Automatic 7046. Delos Turner. 856-288-1mo

The Devil's Tower.

Rising 600 feet above the surrounding country, the Devil's Tower is one of the most conspicuous natural objects in the Black Hills region. Its nearly perpendicular sides are fluted by great rock columns, some of which are six feet in diameter. The tower is situated on the west bank of the Belle Fourche river, south of Hulet, Wyo., and is one of several bold buttes left by erosion in the northern Black Hills. In the opinion of some geologists Devil's Tower is connected with lower strata by an underlying vent.

BRITISH MOVING SLOWLY ON LENS

Steadily Hemming in Center of Great Coal Deposits.

ATTACK AT VARIOUS POINTS

Raiding Parties Carry Out Many Successful Operations Against Germans in France and Belgium—Fierce Encounters for Mastery of the Air.

London, June 26.—Gradually the English forces are hemming in the town of Lens, the center of great coal deposits, and from which prior to the war more than 5,000,000 tons of coal were exported annually.

Successful raids Sunday night by the British gave them 400 yards of trenches in the woods at the western outskirts of the city, while Monday's operations brought them further along both banks of the Souchez river on a front of about a mile and a half southwest of the town.

The British troops are harassing the Germans at various points along the front in Belgium and France with nightly raiding parties, which have been successful in killing numerous Germans and taking others prisoner.

British and German airmen continue to strive for mastery in France and Belgium.

Many Fights Occur in Air.

Sunday witnessed the destruction of five German airplanes in battles in the air and another by anti-aircraft guns, while five others were sent to earth out of control. The British, however, lost five machines.

Mighty artillery duels between the French and Germans still are in progress on several sectors between Soissons and Rheims. Apparently the Germans have ceased their infantry operations, as the latest French official communication makes no mention of fresh thrusts by the crown prince.

The fighting along the Russian front again has extended into the Carpathians around Kirilbaba, on the Bukovina frontier. In Galicia, between the Zlota Lipa and Narayucka rivers and along the upper Stripa, the fighting between the Austro-Germans and Russians is described by Berlin as "lively."

Operations in the Austro-Italian theater again have lost their intensity.

TRYING TO SECURE CAMP

Secretary of War Receives Twin City Delegation.

Washington, June 26.—Newton D. Baker, secretary of war, granted a hearing to the Twin City delegation which came to Washington to land the national army cantonment for Fort Snelling in case Des Moines is rejected.

The delegation was informed that the whole question is in the hands of Major General Thomas H. Barry of the Central department, who was at Des Moines investigating complaints against the transportation and sanitary facilities at Des Moines.

If he rules against Des Moines, Secretary Baker said the whole subject will be reopened.

He said the liquor question would not be a material factor, as the army bill gives the secretary of war full authority over that subject, and in addition congress is expected to enact bone dry legislation for the period of the war.

BOHEMIAN TROOPS DESERT

Leave Austrian Army in a Body at Every Opportunity.

Copenhagen, June 26.—The disclosures of the retiring Austrian minister of defense, F. von Georgi, before a reichsrath committee that three Bohemian regiments had, during the war, gone over to the enemy in a body and his statement that Czech prisoners of war had volunteered for services against Austria-Hungary in considerable numbers, revealed only a part of the anti-Austrian demonstrations of Bohemian troops.

It is freely admitted in Austria-Hungary that from the beginning of the war Bohemians deserted en masse at every opportunity.

BUTTE STRIKE MAY SPREAD

Metal Trades Council Threatens to Call Out More Men.

Butte, Mont., June 26.—The metal trades council of Butte informed C. F. Kelly, vice president of the Anaconda Copper Mining company, that unless the men at the mines who are doing the work of electrical workers are stopped trades union men employed at the mines will be called out.

Mr. Kelly replied that the men will not be discharged.

The force now at work at the mines, it was stated, is able to produce 10 per cent of the daily normal output of 17,000 tons of ore.

Thirty-eight More Ships.

Washington, June 26.—Contracts for ten more steel ships and four wooden cargo vessels have been let by General Goethals. Twenty-four additional wooden hulls have been contracted for.

Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

I have just started to operate my car after having had it in the garage for four months, during which time the battery ran down. A man told me that it would do no harm to the electrical end to go ahead and run the car without having a battery in it to take care of the current, saying that if I had no battery to receive the current it could not generate any. Later I met another man who said I should not run the car a mile without a battery in it, because by so doing I would burn the wiring out of the dynamo because I was generating current and that without the battery there to receive it would put my electrical apparatus all out of commission. Which opinion is correct?

In the first place you were wrong in leaving the battery in the car for a period of four months, during which time the battery was allowed to run down. The battery should have been given an extra charging at occasional intervals in order to keep the specific gravity up to the standard, which is between 1.275 and 1.300. In laying up the storage battery for the winter it must be remembered that the battery as used for electric starting and lighting or for electric lighting only is strictly an electro-chemical apparatus and requires a certain amount of care, whether idle or in actual service. Therefore if the car owner will bear this in mind and follow the directions given herein he should have little difficulty in keeping the battery in good condition during the winter months. If the battery is always filled to the proper height and kept fully charged within the limits of the standard 1.280 to 1.295 it may be safely considered as being in healthy condition. Every car owner should have a hydrometer syringe to use in determining when the battery is fully charged, and it will also be found convenient to use in filling the battery with water.

When I open the throttle of my car suddenly the motor misses fire badly and sometimes stops entirely. What is the matter?

You are feeding too much gasoline, which is drawn into the cylinders in an undivided state and is not readily explosive, thus causing the engine to miss fire and choke. If you will adjust your carburetor so that a greater proportion of air is mixed with the gasoline you will have no further trouble of this character.

All things being equal, would there be any difference in the power of an engine with a hundred pound flywheel with a small or large diameter?

There would be more energy stored up in a one hundred pound flywheel of the larger diameter, but a motor that develops a certain maximum horsepower with a one hundred pound flywheel sixteen inches in diameter will not necessarily develop more power if a one hundred pound flywheel of twenty inches is fitted. For a motor of a certain compression a certain diameter and weight of flywheel is required. It must be capable of storing up enough energy during the explosion stroke of the piston to keep the crank shaft revolving at a steady speed until the force of the next explosion is imparted, etc. In designing a flywheel a number of factors must be taken into consideration which affect the weight and diameter. Where a motor is mounted in a subframe that will not permit of the use of a twenty inch flywheel weighing 100 pounds a sixteen inch flywheel of, say, 120 pounds might be equally well employed. By increasing the diameter of a flywheel its weight may be decreased, and vice versa.

Will you please tell me the number of pounds compression there should be in cylinders? I have a gauge for testing compression, but do not know how many pounds per cubic inch there should be.

This depends upon the design of the motor, but the average is about sixty-five pounds per square inch. The maker of your car will tell you the pressure for which the motor was designed.

Will you kindly tell me how to temper a spring?

The exact heat treatment to be given a spring steel depends on the composition. However, assuming that the steel is a 0.95 carbon steel, which is a grade of steel generally used for springs, the treatment after shaping or coiling, as the case may be, is as follows:

First.—Heat to 1,425 degrees—1,475 degrees F.

Second.—Quench in oil.

Third.—Reheat to 400 degrees—900 degrees F.—in accordance with the degree of temper desired, and then cool very slowly.

The higher the drawing temperature (operation 3) the lower will be the yield point of the material. On the other hand, if the material be drawn at too low a temperature it will be brittle. A few practical trials will locate the best temper for any given shape or size.

You should also remember that the heat treating of springs is usually entrusted to the spring maker, and, unless absolutely necessary for the work to be done, and by some one who knows this kind of work, it is advisable to refrain from doing it. Inexperienced persons are likely to ruin the material.

Why will a gasoline engine fire back into the carburetor on too lean a mixture?

Primarily back firing in a carburetor is due to a choking or want of gasoline mixture in the cylinders or to poor timing or sticking open of an intake valve. Although it is an uncommon occurrence for valves to stick open, it sometimes occurs as a result of a bent valve stem. Many valve stems have been bent by workmen in prying up the valve spring for the purpose of removing the pin that secures the spring seat to the stem. When a popping in the carburetor takes place one should examine the valves and see that they are working properly and regularly before tackling the carburetor.

The most common cause of popping or back firing in the carburetor is that of a weak mixture, due either to water in the carburetor or a shortage in the fuel supply. A weak mixture is a slow burning one, and it generally is claimed that a weak mixture burns so slowly that it is still burning and with some pressure when the inlet valve opens on the following stroke. Some, however, are of the opinion that under ordinary working conditions the mixture in the intake pipe of a motor is not in a condition to be explosive, but when it has been starved to a certain extent it becomes explosive and the back firing takes place. It being maintained that at high speeds there always is a flame in the cylinders, but this flame is not sufficiently hot at the end of the exhaust stroke to ignite the incoming mixture of the next charge except when the previous charge also was a weak and a slow burning one.

Should spark plugs of only one manufacture be used on a four cylinder engine? Would this give better results than four different kinds?

It seems reasonable to believe that the use of one make of plugs in all the cylinders of a motor at one time would be most practicable, inasmuch as they would be most likely to promote more uniform firing owing to their similarity of construction. It is possible, however, to adjust almost any combination of different makes of spark plugs so that no difference in the regularity could be detected.

Is the expansion in an automobile motor caused by the explosion of the gas or the burning of the gas?

The motive power is due to the explosion of the gas. The quicker the gas can be exploded the better. In explosion it is necessary for a rapid propagation of the flame, but it is not the burning that gives the power. If the burning gave the power then a slow burning, rich mixture would be very powerful, whereas it is the opposite. In the explosion of gunpowder the power is due to the sudden formation and expansion of gases, into which the powder is converted by chemical energy. When gasoline is exploded the hydrogen and carbon in contact with the air are ignited and pass off in the form of invisible gases.

Would the removal of spring leaves improve the riding qualities of a car?

It is not advisable to remove any of the leaves from the springs. These are designed to carry the load without being too stiff, and the removal of leaves would not only weaken the springs unduly, but might spoil the riding qualities.

What is the best way of painting or enameling lamps and brass equipment on cars? I have frequently attempted to do this sort of work, but without success. Perhaps you can inform me of some practical method.

Of course nickel trimming is generally to be preferred to a brass finish, but if you want to get almost the same effect with brass equipment you can give it an aluminum finish that looks almost like silver by cleaning the brass thoroughly and painting it with aluminum paint. This work requires no particular skill or experience and can be performed with an ordinary small paint brush. The paint will stay on if allowed to stand for a little while, and after the first twenty-four hours it is almost impossible to remove it. Heat only makes it stick the tighter. This finish looks better than unshined brass and requires no further attention after it has been applied. The paint costs less than 50 cents for enough to cover all the brass on one car, and the operation can be completed in about three hours. The paint is prepared for use on radiators, steam pipes, stoves, etc., and the heat of the radiator or lamps will not affect it. It can be applied once a year or oftener if desired.

What should be the condition of the compression chamber in a motor when working to best advantage? Should the piston head and compression space be dry and sooty or in an oily condition?

By all means the combustion chamber of an internal combustion engine should be well lubricated. Never let carbon, or, in the above phrasing, soot, remain in it. As much oil as can be used should be in the cylinder at all times, the maximum being the greatest amount possible without smoking.

DODGE BROTHERS MOTOR CAR

A standard which was naturally high, has been made higher still, by the bestowal of complete confidence on the part of the public.

It is a mutual contract which offers constant inspiration to the manufacturer and constant insurance to the customer.

With the interests of buyer and seller so closely knit together, the result, everywhere, is what might have been expected.

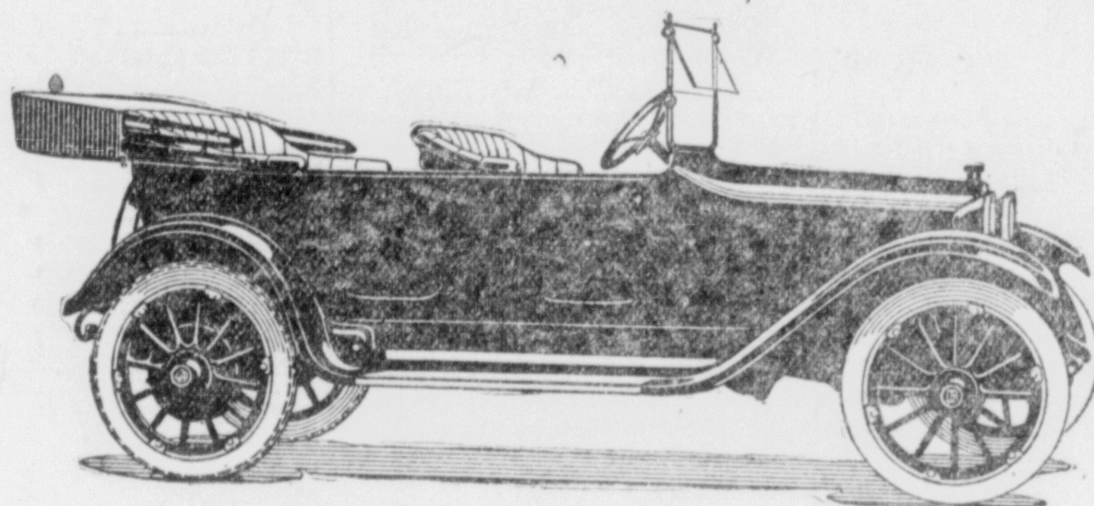

It is impossible, for the Dodge Brothers, with all their great facilities, to build enough motor cars to satisfy the public.

It will pay you to visit us and examine this car.

The gasoline consumption is unusually low. The tire mileage is unusually high.

Touring Car or Roadster, \$835; Winter Touring Car or Roadster, \$1000; Sedan or Coupe, \$1265 (All prices f. o. b. Detroit)

TEUTON SEA LOSSES CALLED NEGLIGIBLE

Berlin, June 26.—Under the caption "Submarine Warfare and War Costs," the North German Gazette prints the following:

"In none of the warring countries has the question of war costs attracted that degree of attention one was previously led to believe it would.

"The entrance of the United States into the war is accounted for in no small degree by the circumstances that they long since became the creditors of our enemies, whose bankruptcy they saw approaching and desired to avert as far as possible.

"In connection with the participation in the war of the United States and their far-reaching shipbuilding plans it is especially desirable to project the question of the costs of submarine warfare into public discussion. How do the material losses of our enemies compare with those we are suffering? The answer is quite plain.

"Offsetting the monstrous values which the entente powers are losing daily in ships and cargoes, foremost of which are those of England, not to mention the cost of meeting the submarine war, our losses are almost infinitesimal. They consist only in U-boats and munitions."

TAKING CATHARTICS EVERY DAY FOR WEEKS DON'T CURE STOMACH TROUBLE

They do not eliminate the poisonous bile secretions from the system, so declares a leading Chicago stomach specialist. Often gall stones, cancer and ulcers of the stomach and intestines, auto intoxication, yellow jaundice, appendicitis and other dangerous ailments are the consequences. Mayr's Wonderful Remedy is the ideal prescription for stomach, liver and intestinal ailments. It has restored millions. One dose will prove that it will help you. Mayr's Wonderful Remedy is for sale at Johnson's Pharmacy. —Advrt.

THE GOOD JUDGE TELLS WHICH IS BETTER, AND WHY IT IS.

JUDGE, HE PAID 10 CENTS FOR HIS TOBACCO, I PAID 10 CENTS FOR MINE—WHICH DO YOU THINK IS BETTER?

YOURS, OF COURSE! W-B CUT TOBACCO COMES IN SMALL PACKAGES, WHILE CHEAP ORDINARY TOBACCO COMES IN BIG BAGS.

A good many people are looking into what makes men change over to W-B CUT and stick to it so. Tobacco is tobacco, but all chewing, isn't all tobacco. You don't have gummy excess sweetening to chew out of W-B CUT, before you get down to satisfaction. The shreds are tobacco, through and through—and the richest, sappiest tobacco that grows. You notice the difference at once—W-B CUT goes twice as far as ordinary plug.
